Portfolio by Space & Function

We are a fast-growing company founded in 1989. We have grown from a furniture manufacturing business, to an international design presence, dramatically increasing our product offer across multiple product typologies.

Our design principles lead us in creating highly versatile products that spontaneously adapt to a multiplicity of contexts, styles and uses that are difficult to fit into a specific pre-established category.

Supporting you to easily navigate the totality of Arper's portfolio, with its multiple configuration options, we created the "Portfolio by Space & Function" tool. It aims at illustrating our product offering segmented by typical space situations, and correlated needs.

The Spaces & Functions we identified and illustrated are:

- — Lounge – Waiting Area
- — Break Out Area
- — Bar & Cafeteria
- — Restaurant
- — Meeting Room
- — Executive Offices
- — Workplace
- — Learning, Training & Conferencing
- — Outdoor
- — Stackable Guest chair

Please note in the tool we segmented our standard product offer. Should you have customization requests, please contact our Sales Dept. The "Portfolio by Space & Function" tool is available at the following link:

Introduction to Arper Price List

Arper Price List is a complete and comprehensive tool, including all relevant information to formulate an order. Please find below some instructions to simplify the consultation.

- 1 Product description and materials with which it is made; information on stacking characteristics (where possible) and related matching accessories (the complete list can be found on the last pages of each specific collection).
As far as sofas and upholstered items in general are concerned, seat height indicated in the price list refers to the maximum height measured in the seat center.
- 2 Prices matrix: for each article code number, the prices exclusive of VAT are shown, according to the 14 classes of upholstery available.
- 3 Technical information related to:
shipping: number of packages, weight and volume
product: fabric length / leather needed for the realization of the product with upholstery outside the price list (COM and COL)
resistance and fire retardancy testing to which the product has been subjected and validated (only available for upholstery within the Carded In programme).
- 4 Finishes available for base and shell; detailed images of elements that can be configured on the product (e.g. armrests).
- 5 Technical and environmental product certifications available.

Currency

Prices are indicated in Sweden Krone (SEK).
All prices are unit prices without VAT (excluding VAT).

in writing to Arper, citing the specifications of the fire-retardant norm with which the articles must comply.

Dimensions

The dimensions of all articles are given in centimetres (cm).

Quantity

The number of pieces per box is stated in the description of the selected item – any quantity other than that specified is not permitted.

It is not possible to combine articles of different colours and/or materials and/or structure finishes inside the same box.

Volume

The stated volume refers to the space occupied by the box(es) necessary for the selected item. It is therefore recommended that an increase of approximately 10-15% should be applied to the total volume to allow for gaps which naturally occur between cartons whilst loading.

The company reserves the right to make modifications and improvements of a technical or aesthetic nature to the product without warning.

Fire-retardancy

Arper products can be supplied treated for fire-retardancy. However, since the regulations vary from one place to another, we advise you to check up on the local regulations. Any requests for fire-retardant treatment must be sent

Consultation Guidelines

Catifa 46

Design by Lievore Altherr Molina, 2004

Chair with four-leg frame, available in chromed or powdercoated steel, or brushed stainless steel versions. The shell is available in single-colour polypropylene, bi-colour polypropylene or upholstered in hard leather grade 1 (CT) or hard leather grade 2 (CU). Versions with polypropylene shell and powdercoated or brushed base can be used outdoor. Steel armrests, also with pad, are available upon request.

Stackability:

- Up to 10 pcs. (should the weight exceed 25 kilos a handling tool must be used).
 - With trolley: up to 20 pcs.
 - CT/CU versions: max. 5 pcs. With stacking pad.
- VERSION WITH ARMRESTS STACKABILITY
- Up to 5 pcs. (should the weight exceed 25 kilos a handling tool must be used).

Leather finishes

The leather upholstery offer consists of the following program:

Elmosoft leather

Semi-aniline leather Chrome free

Leather

Soft leather

Pigmented leather

Elmocoast leather

Pigmented leather

Semi-aniline leather combines naturalness, comfort and durability. The surface of this leather is treated with a lightweight coat of color that increases its wear resistance, preserving its natural look with a soft and pleasing feel.

Elmosoft leather: soft and flexible semi-aniline leather. Its softness and breathability, coupled with a durability and an extremely wide color range, make it suitable both for contract and residential sectors.

Pigmented leather in terms of manufacture, the leather undergoes the same processes as aniline or semi-aniline leather, with additional dyeing and finishing treatments to meet different needs in terms of comfort, softness to the touch, strength, durability and color. Its wear resistance and ease of cleaning make it suitable for many uses.

Soft leather: leather characterized by a smooth and uniform surface, soft to the touch with a delicate and natural grain, which lends it a particularly elegant feel.

Neocoast leather: leather characterized by a uniform surface, with a light grain and a soft feel, available in a wide range of shades.

Leather finishes

Natural characteristics:

Leather and hard leather may show marks and imperfections such as wrinkles, veins, differences in color from one batch to another. These are distinctive features that distinguish genuine leathers and their natural beauty, ensuring the authenticity of the material and the unique comfort that only a natural product can offer.

Also our leather samples reflect this variability, both among different types of leathers and for the same type of leather, changing the shades of color and their natural features.

Any samples, supplied on request with reference to individual orders, are not to be considered as a guarantee of perfect homogeneity between sample and actual supply.

In this respect, the characteristics listed below are intended to be compliant with Arper quality standards and shall not constitute a ground for disputing products:

Grain variations example

Backbone example

— Grain variations: areas of the leather where grain can be coarse, for example the part of the leather between the side and the belly.

— Wrinkles, veins and stretch marks: they have a width of about 3-4 mm, with a slightly rougher grain in the surrounding area. They are more visible against the light.

— Backbone: back part of the animal, where the skin is the most valuable as it is the thickest and most compact part. It can have wrinkles.

— Insect bites: small marks on the surface of the leather due to different types of insect bites.

Wrinkles, veins and stretch marks example

Insect bites example

Cleaning and maintenance:

Avoid exposure of the products to direct sunlight: it can alter the color of upholstery.

Avoid exposure to heat sources.

Dust the leather regularly with a soft dry cloth.

Any stain can be removed using a cloth dampened with water and neutral soap. Do not rub, but gently dab from the edge towards the center of the stain. Dry immediately after treatment.

General conditions for COM/COL customised supplies

Before accepting a customised order using materials provided by the customer, Arper SPA requires a sample of fabric/leather to be submitted DDP (Delivered Duty Paid), together with the duly completed materials chart for a preliminary evaluation of feasibility. For plain color fabrics, the sample must have a size of at least 400 mm x 300 mm; if the fabric features a decorative pattern, the customer is required to contact Arper SPA to ask for the exact size of the sample to send.

If the result of the preliminary test on the fabric/leather sample is not conclusive, Arper SPA will ask the customer to supply a sufficient quantity of material to produce a complete sample, which will then be invoiced in the normal way and sent to the customer for evaluation in accordance with a procedure to be agreed.

The information obtained during the experimentation phase might lead to a request for additional quantities of material and/or lengthening of delivery times. The initial estimate prepared by Arper SPA or the COM/COL list price will be increased by 10% if the customer's order is for less than 8 pieces or if the material supplied does not conform with Arper's product characteristics, resulting in inefficient production.

Arper SPA will not accept any despatch of COM/COL material until the order with relative indication of the quantity of covering material has been accepted.

If the covering material is sent by any delivery method other than DDP (Delivered Duty Paid), Arper reserves the right to reject the material or increase its charge to the customer.

The customer's own fabric must always be sent along with the related invoice, in order to complete the administration procedures connected to product realization and, for products intended for the foreign market, to comply with the necessary customs clearance procedures.

Even if COM/COL is accepted, Arper SPA shall in no way be responsible for the appearance, durability, brightness of colours or any other type of quality problem encountered with the material. The responsibility of Arper SPA is limited to any defects directly attributable to the work performed and warranty will not be extended to the technical performance and/or aesthetic results obtained with non standard materials.

Arper SPA does not accept COM with fabric already listed in the Recapitulations table.

The reported measures refer to bielastic fabrics with solid colour.

For different types of fabrics (monoelastic, print, etc.) requirements and prices will be evaluated upon request.

Customer materials management form

Customer:		Delivery date:		
		Production job order:

Stretch fabric: Yes ☐ No ☐				

Flame Resistance Regulations – Product Requirements

— Italian market

Approved products in Class 1 or 2 or in Class 1IM (M.D. 26/06/84): see notes on page of the relevant article

— US market

All Carded-IN coverings available for the US market are compliant with local regulations: TB117-2013 and San Francisco Regulation (AB2998)

— UK market

All products are available with polyurethane padding compliant with BS5852 Crib 5 (for products that can be configured in both 'STD' and 'IGN' versions, the IGN version must be selected).

All coatings Carded-IN (fabrics, vinyl fabrics, leathers) are compliant with BS5852 Sch. 4 Part.1 Cigarette test "worst case": the laboratory tests the cover over a filling that is either worse than any that is used or is the worst that can be used by a producer. A positive test result therefore indicates that the covering is compliant when used with padding with superior flame resistance.

— All markets

Due to difficulties linked to the coexistence of mandatory and voluntary standards on flame resistance and the differences between the various standards and test methods depending on the country, the intended use and the type of material,.... Please contact customer service for a detailed analysis.

Square version
one colour or two colours
version, with horizontal insert

Square version
one color or two colors version,
with diagonal insert

Round version
one color or two colors version,
with central insert

Freestanding

Freestanding module made up of
a round panel upholstered in one
color fabric on a matt black metal
base.

Freestanding module made up of a round and a square
panel upholstered in one color fabric, with the choice of
a different color for one panel, and resting on a matt black
metal base.

Freestanding module made up of a square panel
upholstered in one color fabric on a matt black metal base.

Parentesit Wall Panel

The primary forms of Parentesit can be arranged to articulate graphic patterns adaptable to any environment.

The positions of the panels can further be assembled into different orientation options that extend the geometric visual language into compositions of parallel, perpendicular, or diagonal lines. All orientations of Parentesit can be determined in the installation process and, with only few tools required, can mount onto any wall surface. Minimal in form, minimal in effort.

The central aesthetic profile is available in the following colours:

- V12 (White Matt)
- V39 (Black Matt)

Warranty: 2 years

The Parentesit Wall Panel is available with three options for embedded functionality.

1 Sound Absorbing:

an acoustic panel version is made from certified sound absorbing materials for when quiet space is needed.

2 Light:

a switch-operated, built-in light-enabled version enhances visual impact.

3 Audio + Light:

light-and-audio-enabled version with dimmer switch is manageable via dedicated app.dedicata (downloadable from App Store and Google Play).

Composition examples

Parentesit Wall Panel

The sound absorbing Parentesit Wall Panel is made from an internal panel that has been tested and certified for its superior performance in absorbing ambient sound. In the testing process, to maximize the effectiveness of the sound absorbing Parentesit Wall Panel, upholstery options are available in fabrics that help to muffle sound, giving additional protection against environmental noise and increased opportunity for quiet, uninterrupted work.

1 The internal panel was tested in a controlled echo chamber according to the UNI EN ISO 354 standard. The results shown here indicate absorption coefficients for every frequency tested, demonstrating the efficacy of Parentesit to reduce noise under a broad range of frequencies.

2 According to the industry standard used to classify sound absorbing material, ISO 11654, the values of sound absorbing coefficients are expressed by α . This table shows the sound absorbing curves classified in classes from A to E, where A is the best.

Note: The sound absorbing characteristics are lost if it is upholstered with non breathable materials.

Parentesit Freestanding

A private enclosure for collaborative work contexts. Freestanding Parentesit creates a retreat for individual, focused work or collaborative group discussions. Four versions — inset little circle, big circle, square, or circle and square combination — are each given structure and substance by a supportive frame. These modular pieces can be combined to create graphic expressions of archetypal forms or customized with color to generate bold compositions that articulate space and define shelter.

Storage module H.60 cm, available in three versions: shelf, open or with hinged doors. The shell is made in textured lacquered MDF. The separator and the internal shelf, the back and the doors are made in MDF with finish in reconstituted oak or walnut. The position of the horizontal shelf, to be defined during ordering, is configurable at two levels. The different modules are arranged for wiring, allowing an efficient cable management.

CHROME FREE

ELMOSOFT è una pelle semi-anilina, morbida e flessibile. La sua morbidezza associata alla sua robustezza e ad una vasta gamma di colori disponibili rendono la pelle Elmosoft adatta ad un utilizzo nel contract. Punture di insetti e cicatrici visibili contribuiscono a valorizzare le caratteristiche di unicità ed eleganza di questa pelle.

ELMOSOFT is a soft and pliable Semi-Aniline leather. Outstanding comfort combined with excellent durability and an extensive shade card, makes it very suitable for the public environment. Visible insect-bites and scars from healed wounds add to the elegant quality of the leather.

ELMOSOFT. Weiches, geschmeidiges Semi-Anilinleder, Ein sehr strapazierfähiges und im Griff komfortables Leder in reicher Farbauswahl, hervorragend geeignet für Objektausstattungen. Sichtbar erhaltene Insektenstiche und kleine vernarbte Wunden betonen die naturechte Eleganz.

ELMOSOFT est un cuir semi-aniline, souple et doux. Son confort élevé, associé à une grande robustesse et à une vaste gamme de couleurs disponibles, le rend particulièrement indiqué pour les collectivités. Les piqûres d'insectes et les cicatrices visibles contribuent à rehausser le caractère élégant du cuir.

ELMOSOFT es una piel semianilina suave y flexible. Su destacable confort combinado con excelente durabilidad y una amplia gama de colores, la hacen muy adecuada para ambientes públicos. Picaduras de insectos visibles y cicatrices de heridas contribuyen a valorar la elegante calidad de la piel.

Istituito nel 1992, il marchio comunitario di qualità ecologica o Ecolabel, il cui logo è rappresentato da un fiore, è uno speciale sistema di certificazione creato per aiutare i consumatori europei a scegliere prodotti e servizi più ecologici e più rispettosi dell'ambiente.

Established in 1992, the EU Eco-label "Flower" is a unique certification scheme aimed to help European consumers distinguish greener, more environmentally friendly, products and services.

Hinter der "Blume", dem 1992 ins Leben gerufenen EU-Umweltzeichen, steckt ein einzigartiges Zertifizierungssystem, das dem europäischen Verbraucher das Erkennen umweltfreundlicherer Produkte und Dienstleistungen erleichtern soll.

Établi en 1992, le label écologique de l'EU symbolisé par la "Fleur" est un système d'homologation unique destiné à aider les consommateurs européens à discerner les produits et services plus verts et plus favorables à l'environnement.

Creada en 1992, la etiqueta ecològica de la UE, también conocida como "la flor", constituye un sistema de certificación único, cuyo objetivo es ayudar a los consumidores europeos a identificar los productos y servicios más ecológicos y respetuosos del medio ambiente.

NCS / RAL / PANTONE codes refer to the masters used for the colours. Surface finishes may cause slight variations in appearance relative to the indicated references.

* The above references are not perfect equivalences, they are the best available match.

** Finishes without colour reference, please request a sample.

Care instructions

Indications for use & maintenance of “outdoor” products:

Arper guarantees, through laboratory tests, the strength and durability of its products. It should be noted, however, that any material exposed to atmospheric agents and the elements, even if treated specifically for outdoor use, will undergo a gradual deterioration over time, the extent of which is closely related to the geographical position, the evolution of climatic phenomena, the more or less marked presence of humidity, salinity (poolside, marine environments).

Use and maintenance are conditions that determine the actual yield and maintenance in good condition of the product over time. It is therefore recommended to avoid critical external conditions such as prolonged and direct exposure to sunlight, pouring rain and aggressive environments such as proximity to the seaside or where the sea breeze can bring high levels of moisture with marine salinity or abrasive sands. Do not place wooden products on lawns or uneven surfaces, where any stagnation of water may damage the parts in contact. In any case, never let water or other liquids stagnate on the product. In the vicinity of plants or trees, remove any leaves, flowers or organic substances that could rest on the surfaces of the product, to prevent that their deterioration stains the paints or fabrics. In case of exposure to rain, as soon as possible, remove the pillows (if any) from the chair and let them dry separately to facilitate drying and drainage of the water. Periodic cleaning is recommended, following the recommended indications for the different materials. For short periods when the product is not in use, it is recommended to cover it with the protective cover. In case of prolonged non-use or during the winter period, it is recommended to clean the product, allow it to dry well, and store it in a well-aerated indoor place, protected from the elements. The pillows (if any) must be removed from the chair, cleaned and left to dry well, and finally, stored in a well-aerated indoor place, protected from the elements.

Papershell:

Dust and common stains can be removed using a solution of water and well-diluted neutral soap. Clean and remove any substance or liquid that accidentally falls on the surface as soon as possible, as it could damage the product. The use of commercial stain removers, aggressive cleaners or those containing bleach, furniture or floor waxes, solvents, or abrasive products must be strictly avoided. Use a soft cloth and clean with gentle circular movements (especially for matte finishes, which may develop shiny streaks if subjected to overly aggressive action); avoid synthetic fiber or metal sponges and pads, as they could irreparably scratch the surfaces. Always dry the surfaces with a dry cloth. In case of doubt, test the cleaning solution on a hidden part of the product to check the result, waiting at least 24 hours for any potential issues to arise. Over time, the material will undergo a color shift, particularly if exposed to sunlight; this should be considered a distinctive feature that highlights its natural beauty. Regular and proper maintenance will slow down this process and prolong the product's lifespan.
